

The speakers explored the transformative impact of emerging technologies on the Indo-Pacific regional order and their implications for India-Korea relations. Dr. SONG discussed technological innovation trends and their geopolitical implications, while Dr. CHO analyzed the security dimensions of emerging technologies in the Indo-Pacific region. Dr. LEE focused on potential areas of technological cooperation between India and South Korea.

The interactive session that followed saw engaging discussions on various aspects including artificial intelligence, cybersecurity, semiconductor technology, and digital infrastructure development. The event highlighted the growing importance of technological collaboration in strengthening India-Korea strategic partnership within the Indo-Pacific framework.

Faculty members, research scholars, and students from various departments participated in the discussion.
